
Major IT improvements at MLC

Major improvements are underway to the IT technology at Macleish Littlestone Cowan, one of the fast expanding solicitors in Essex and Hertfordshire.

Following the successful acquisition of a new office in Sawbridgeworth in October, the firm has just installed the latest IT at its Sawbridgeworth office and increased its IT capacity around its network for improved communications. The improvements include increased bandwidth to speed email and other communication systems, a complete replacement of all IT and the phone system in Sawbridgeworth and improved disaster recovery.

Partner in charge of this upgrade Robert Littlestone said *"Sawbridgeworth is an exciting expansion opportunity. The firm is growing in all offices. Our growth strategy requires us to ensure that we have the IT capacity and latest technology to maintain our growth and most importantly support our services to our clients. Our longstanding IT supplier Utilize plc led by Damian Coates (Director Business Support Team) have been tremendous and ensured that the upgrade and change over was implemented without any disruption to our service and systems."*

Damian Coates said *"Macleish Littlestone Cowan have been longstanding customers. It has always been a pleasure to work with them. They are progressive, willing to invest for the future and understand the benefits to their business of up to date technology."*
